

**We would be honored if you would partner with us
PWWD Pharmaceutical Take Back Day
Saturday, October 22, 2022
10AM - 1PM**

Dear partners,

The Port Washington Water District and Port Washington Police District are proud to host our Pharmaceutical Take Back Day this fall once again on Saturday, October 22, 2022, between 10 a.m. and 1 p.m. This event is crucial to the preservation of our water quality, as it allows residents to discard unused or expired medication quickly and easily in a safe manner without having them enter and contaminate our precious water supply. Community involvement increases every year, but there is always room to grow. We would be honored if you would join us in this endeavor.

We hope that by partnering with us, you would be able to help us promote this free opportunity to protect our most vital natural resource. The Port Washington residents have proven that they are one of the most environmentally conscious communities on Long Island, and increased resident participation in this event is a significant indicator as to why.

If you are interested in partnering with us for this event, we ask that you please send us your organization's logo so that we can feature it on our Pharmaceutical Take Back Day banners and flyers. Your only responsibility as a partner is helping us spread the word.

We hope that you can Do It for Port and join us in this effort to protect our environment!

Sincerely,

Italo Vacchio, Superintendent
David Brackett, Commissioner
Peter Meyer, Commissioner
Mindy Germain, Commissioner
